

Supplemental Application for Discharge of Contaminated Stormwater

King County Industrial Waste Program

This form shall be submitted along with a King County Wastewater Discharge Permit Application. You may need to amend a current permit or complete a new permit for this purpose.

Attach additional information as necessary.

Company Name:_____

Permit Number (if applicable)_____

Activities leading to unavoidable contamination of stormwater:

Square footage of area proposed to drain to sanitary sewer:

Descriptions of site modifications made to reduce the volume of stormwater discharging to the sewer. Examples include relocating activities to roofed areas and connection of roof drains, parking lots, or outdoor storage to the storm drain.

Descriptions of methods used to minimize the degree of contamination of stormwater discharging to the sanitary sewer. Examples include installation of oil/water separators, regularly cleaning process areas, and training and educating employees.

Description of any stormwater flow controls, such as pumps, tanks, which restrict or retain the flow of stormwater to the sanitary sewer. Include the discharge rate in gallons per minute or cubic feet per second.

Is there a wastewater meter? If so, describe the meter type and number.
